PERSONAL STATEMENT

Full-Stack Developer experienced in building scalable web and mobile applications using **HTML, CSS, Tailwind CSS, JavaScript, JQuery, React.js, PHP, Laravel**, and **CakePHP**, with expertise in working with databases such as **MySQL, NoSQL**, and **Firebase**. Skilled in debugging, optimizing performance, and delivering user-friendly solutions. Adaptable, results-driven, and focused on meeting evolving business needs.

WORK EXPERIENCE

Web Developer

Forty Degree Celcius.inc — June 2024–Present

- Developed and maintained features for the NativeCamp platform using **CakePHP** and **Angular**, improving system reliability
- Optimized application performance through bug fixes and code refinements, enhancing user experience
- Collaborated in a team environment to ensure seamless frontend-backend integration.
- Contributed to scalable architecture decisions supporting platform growth

Back-end Developer Intern

Onsource, Inc. — February 2024–May 2024

- Engineered the WorkwiseHR system using **Laravel**, designing **RESTful APIs** for employee management modules
- Optimized MySQL database performance, improving query efficiency and system response times
- Implemented secure, role-based access control for HR workflows
- Participated in full development lifecycle from design to deployment

Freelance Web and Mobile Developer

Self-employed — June 2022–February 2023

- Delivered custom solutions for clients including inventory systems and mobile applications
- Adapted to varied project requirements using PHP, JavaScript, and React Native
- Managed client relationships and translated business needs into technical specifications

TECHNICAL PROJECTS

NativeCamp Platform

Forty Degree Celcius, Inc. — *CakePHP, Angular, jQuery, JavaScript, HTML, CSS*

- Contributed to **developing new features**, fixing **bugs and defects**, and enhancing **backend functionality** in a **team-based environment**
- Implemented role-based access control and maintained scalable backend operations

WorkwiseHR - HR Information System

Associated with OnSource Growth Solutions — *Laravel, React.js, MySQL*

- Developed a full-stack HR platform automating employee management, attendance, leave, and payroll
- Built responsive frontend and secure RESTful APIs with role-based permissions

IoT Pet Feeding System

Thesis Project (Team-Based) — *Next.js, React Native, Firebase*

- Built a web/mobile app with IoT integration for customizable pet feeding schedules
- Enabled real-time communication between application and hardware devices

Animist Anime Streaming App

Self-employed — *React Native, NoSQL, API Integration*

- Built mobile app with third-party API integration for streaming content
- Implemented search, categories, and favorites for enhanced UX

Computer Parts Inventory System

Self-employed — *PHP, JavaScript, jQuery, MySQL, Bootstrap*

- Created a management system for tracking computer components with real-time stock insights
- Streamlined inventory control and reporting processes

AAR9SPEED Sales and Inventory System

Self-employed — *PHP, JavaScript, jQuery, MySQL, Bootstrap*

- Developed sales and inventory system for motor parts business
- Features sales tracking, inventory management, and stock control

TECHNICAL SKILLS

- **Backend:** Laravel, CakePHP, Node.js, RESTful API Development
- **Frontend:** React.js, Next.js, Angular, React Native, JavaScript, jQuery, HTML, CSS, Tailwind
- **Languages:** PHP, JavaScript, Java, C#, Dart
- **Databases:** MySQL, SQL Server, MongoDB, Firebase
- **Tools:** Debugging, Performance Optimization, Git, Full-Stack Development

EDUCATION

Bachelor of Science in Information Technology (BSIT), Cebu Technological University, 2024
